CARISA CAPITAL TO BE INCREASED

New Issue of 100,000 Shares, Already Spoken for at Par, Is Authorized.

Colonel Ed Loose, who is now the controlling factor and general hypochondriac of the Carisa Gold & Copper Mining Company, stated yesterday that the capital stock of the corporation was to be immediately increased from 500,000 shares. A broad and vigorous campaign of development, he says, is being planned, and as the stock of the company is non-assessable, and as a large development fund will be required, the only way to get the money was to increase the number of shares and turn the stock into cash.

And the nicest thing about the proposition, said Colonel Loose, "is that practically every share of the new stock is already subscribed for at par, or \$1 a share. Some of the folks wanted to see the capital stock doubled and made 1,000,000 shares, but I told them that we had enough high capitalized propositions in Tintic already."

Manager Loose believes that the Carisa property, which has produced a great deal of high-grade copper and gold ore in the past and which has since and before its incorporation paid handsome dividends, has never had its main ore-bearing channels tapped as yet. It is therefore the purpose to put a pool

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of the Boston Copper Stocks, Boston, Dec. 7.—Coppers were very dull today and gradually declined. The various pools were quiet and allowed their specialists to sag at the will of the traders. East Butte, which will be listed soon, was very active on the curb, selling up to \$2.50. Superior and Belmont were selling over 18 and closed higher. Expect higher prices and find that some of the keenest men in New York are after this bull movement after this dull spell is over.

FORMER SALT LAKE HITS IT AT SEVEN TROUGHS

O. D. Banks, formerly in the millinery business in this city, now mining in the Seven Troughs district, Nevada, is reported to have made a strike that he expects will make him wealthy one of these days. While doing assessment and location work in open cuts he has struck a vein which at a depth of less than ten feet carries 37.05 gold and 54 ounces silver. This prospecting was done on one of his properties, which has a porphyry and quartz dike running its entire length and in which surface showings vary from twenty-five to a hundred feet from the surface.

Mr. Banks bought the group of claims, which comprise about sixty-five acres, some four or five weeks ago, paying spot cash for them. Many of his friends doubt his wisdom and treated his venture into the mining world from "feathers and children" as a joke. He now laughs back, as he has had time to assay and explore his ground sufficiently to know that he has a property that may yet prove a bonanza.

He has assayed the dike matter, which stands three or four feet above ground, with these results: In one place the dike shows the assay of \$1.50 gold, 32 ounces silver; another sample about 900 feet distant assayed \$1.50 gold and 18 ounces silver. An assay cut was run at the bottom of a hillside about 150 feet with the result that ore running \$7.05 gold and 54 ounces silver was opened up less than ten feet from the surface.

FORMER SALT LAKE HITS IT AT SEVEN TROUGHS

O. D. Banks, formerly in the millinery business in this city, now mining in the Seven Troughs district, Nevada, is reported to have made a strike that he expects will make him wealthy one of these days. While doing assessment and location work in open cuts he has struck a vein which at a depth of less than ten feet carries 37.05 gold and 54 ounces silver. This prospecting was done on one of his properties, which has a porphyry and quartz dike running its entire length and in which surface showings vary from twenty-five to a hundred feet from the surface.

Mr. Banks bought the group of claims, which comprise about sixty-five acres, some four or five weeks ago, paying spot cash for them. Many of his friends doubt his wisdom and treated his venture into the mining world from "feathers and children" as a joke. He now laughs back, as he has had time to assay and explore his ground sufficiently to know that he has a property that may yet prove a bonanza.

He has assayed the dike matter, which stands three or four feet above ground, with these results: In one place the dike shows the assay of \$1.50 gold, 32 ounces silver; another sample about 900 feet distant assayed \$1.50 gold and 18 ounces silver. An assay cut was run at the bottom of a hillside about 150 feet with the result that ore running \$7.05 gold and 54 ounces silver was opened up less than ten feet from the surface.

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of the Boston Copper Stocks, Boston, Dec. 7.—Coppers were very dull today and gradually declined. The various pools were quiet and allowed their specialists to sag at the will of the traders. East Butte, which will be listed soon, was very active on the curb, selling up to \$2.50. Superior and Belmont were selling over 18 and closed higher. Expect higher prices and find that some of the keenest men in New York are after this bull movement after this dull spell is over.
